Achievements

I always enjoyed my school life at Mill Chase and I always aimed to work hard and do the best that I could do. I feel it prepared me for life after school by making me independent and by giving me responsibilities and deadlines to work towards.

I cannot say that I left Mill Chase knowing what career path I wanted to take, however schooling there gave me the foundations to have confidence in my own personal decision making and made me aware of the potential that I had to carve my own path in life.

I met my now husband at Mill Chase and we have been together since going to school together. We were both very happy there and would not change our school days. We still talk to this day about the teachers and the experiences that we both had while at Mill Chase, and we value the importance of that time and being able to look back on it together.
